

Astronomy Club, IIT BHU Varanasi

about 2 years ago

On 7th November we finally concluded the second round of TELESCON, our telescope fabrication event of Astronomy club in collaboration with Club of Sustainability and Innovation.

The teams worked hard for weeks to build their first own telescopes. Teams were expected to work with their respective mentors and put up a creative design for their telescopes before judges in the first round of event. Detailed designs, use of sustainable material and thought put in utility beyond competition was encouraged. Designs gave clarity to teams about their vision when they worked in TAC(Technical Activity Centre).

Final results were evaluated by considering both rounds. Judges said it was a tough call as the designs and executions were on spot. The participants were also judged on how efficiently they used their telescopes and that made the final difference. The winning teams along with their team members are-

First position : Nidavellir

Mahesh singh tomar

Harsh Shukla

Harshwardhan joshi

Harsh pandey

Second position : Equinox

Harsh Nilesh Agrawal

Evuri Harish

Gaurav Meena

Gaddam Jeevan Reddy

Third position : Eclipsers

Tanmay Sharma

Tushar choudhary

Yash Garg

Vaibhav Agarwal

Kinshuk Dwivedi

Special Mention :

Nebuscopers

Cosmonauts

Congratulations to all the winners!
